DETAILED ACTION

Claim Rejections - 35 USC § 101

1. The rejection of claims 21-36, 57-72, and 93-108 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter in the Office action mailed 31 May 2007 is withdrawn in view of the amendment filed 30 August 2007.

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 37-49, 51-56, 73-85, and 87-92 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

A statutory process must include a step of a physical transformation, or produce a useful, concrete, and tangible result (*State Street Bank & Trust Co. v. Signature Financial Group Inc.* CAFC 47 USPQ2d 1596 (1998), *AT&T Corp. v. Excel Communications Inc.* (CAFC 50 USPQ2d 1447 (1999))). Claims 37-49, 51-56, 73-85, and 87-92 are drawn to computer systems and computer programs that do not produce a result that is a physical transformation, thus the Examiner must determine if the instant claims include a useful, concrete, and tangible result.

As noted in *State Street Bank & Trust Co. v. Signature Financial Group Inc.* CAFC 47 USPQ2d 1596 (1998) below, the statutory category of the claimed subject matter is not relevant to a determination of whether the claimed subject matter produces a useful, concrete, and tangible result:

The question of whether a claim encompasses statutory subject matter should not focus on *which* of the four categories of subject matter a claim is directed to 9-- process, machine, manufacture, or composition of matter--but rather on the essential characteristics of the subject matter, in particular, its practical utility. Section 101 specifies that statutory subject matter must also satisfy the other "conditions and requirements" of Title 35,

Art Unit: 1631

including novelty, nonobviousness, and adequacy of disclosure and notice. See *In re Warmerdam*, 33 F.3d 1354, 1359, 31 USPQ2d 1754, 1757-58 (Fed. Cir. 1994). For purpose of our analysis, as noted above, claim 1 is directed to a machine programmed with the Hub and Spoke software and admittedly produces a "useful, concrete, and tangible result." *Alappat*, 33 F.3d at 1544, 31 USPQ2d at 1557. This renders it statutory subject matter, even if the useful result is expressed in numbers, such as price, profit, percentage, cost, or loss.

In determining if the claimed subject matter produces a useful, concrete, and tangible result, the Examiner must determine each standard individually. For a claim to be "useful," the claim must produce a result that is specific, and substantial. For a claim to be "concrete," the process must have a result that is reproducible. For a claim to be "tangible," the process must produce a real world result. Furthermore, the claim must be limited only to statutory embodiments.

Claims 37-49, 51-56, 73-85, and 87-92 are not limited to computers or computer programs that produce a tangible result. A tangible result requires that the claim must set forth a practical application to produce a real-world result. The claims do not require that a result is outputted to a user. The computer apparatus and computer program of the claims have a limitation that the means for display displays a user input display rather than a display of a result produced by the computer or program. This rejection could be overcome by amendment of the claims to recite that a result of the method is outputted to a user, a display or to a user-readable format, or by including a result that is a physical transformation.

Response to Arguments

3. Applicant's arguments filed 30 August 2007 have been fully considered but they are not persuasive. The applicants take the position that the display of a user-input matrix is a result, however the result of the claimed subject matter as a whole is not outputted to a display.

Allowable Subject Matter

4. Claims 1-13, 15-36, 57-72, and 93-108 are allowable.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
